Cognitive Psychology: Training for the Real World

In some areas of the Professional program we have placed an emphasis on cognitive psychology, or how the brain works. This is the focus of the course.

Cognitive psychology is the study of how the mind works. It is the study of how we perceive, think, and learn. It is the study of how we solve problems and make decisions.

Philosophy's Department offers a variety of courses that explore the mind and its processes. For more information, please contact the department.

Cognitive Psychology: Training for the Real World

In some areas of the Professional program we have placed an emphasis on cognitive psychology, or how the brain works. This is the focus of the course.

Cognitive psychology will help students understand the environment, and it helps the students understand the behavior of others.

Philosophy's Assessment Model: Logic is among the most important of skills and is assessed for 100%.
